

## Printer/Scanner Cables Facilitate Communications

---

### Intermec

**What could be easier than a beep?** Intermec ScanPlus and Sabre scanners interface directly with bar code label printers facilitating printer operation. Intermec scanners read a barcode that automatically enters data to the printer. The data could include a part number or product name that is printed on a pre-programmed label format. The new cable connection for these scanners enables users to communicate directly with printer and eliminate data entry methods such as personal computer keyboard functions and data entry errors.

### Benefits

- Immediate data entry using a scanner – no keystrokes required
- Minimize human errors
- Reduce capital equipment expenditures
- Quick and easy configuration
- Maximize stand alone smart printer applications

### Printers Supported

- EasyCoder Smart Printers with Fingerprint firmware
- EasyCoder PM4i
- EasyCoder PF2i, PF4i, PF4ci
- EasyCoder PX4i, PX6i
- EasyCoder C4

EasyCoder C4

EasyCoder  
PM4i

EasyCoder  
PF-Series

EasyCoder  
PX-Series

### Features

- RS232C cables available for ScanPlus 1800 series and Industrial Sabre series scanners
- Data is received on serial port of the printer
- No separate power supply is required
