

UMD Procurement Services

As an existing UMD customer, save money on your ICT purchases using our ICT procurement services.

UMD provides a “Procurement Service” to assist our customers in the acquisition of Information and Communication Technology (ICT) equipment. View our catalogue below to see our extensive range of hardware and software available.

This service is designed to help businesses fulfil their ICT equipment needs, ensuring businesses are up to date with the latest technologies and enhancing operations.

The following list (with embedded links to Vendors websites) is indicative of the many Vendors from whom UMD can acquire products as part of our procurement services. Note this service does not apply to UMD’s standard product offering of data capture and equipment (as typically detailed on our website), and not all Vendor products are available. (E&EO).

With our procurement service, UMD does not accept any liability or responsibility for “fitness for purpose” as the equipment is specified by the customer and consulting is not provided in the selection of IT equipment. *UMD also provides a suitable price to reflect this service.*
